Remark

Emission: Operational control approach is used for Scope 1, Scope 2, Scope 3 Category 1-14 emissions for own operation plants, while emission of Scope 3- Category 15 Joint Venture power plants is calculated based on equity approach.

Production (ground rule): Number of plants must equal to environmental performance.

Environmental Eco-efficiency (ground rule): Data to be included after data is collected for full 4 years or after 3 years of M&A COD
